# IntelliBlink™

IntelliBlink™ is a powerful visual inspection prototyping software, which makes it simple to address sophisticated vision applications. With a future-oriented design that users can flexibility combine various algorithm tools to meet needs. It helps users improve time and costs to market.
Our software offers users an excellent experience with secure efficiency and great quality. We also offer support and training in the entire product life cycle.
IntelliBlink™ Workflow

1 Deploy Software

2 Acquire Images

3 Configure Vision Tasks

4 Customize Application

5 Communicate Data

WYSIWYG

Drag-and-drop Interaction simplifies development difficulty.

Learn more at Page 2

Powerful Hardware Compatibility

Support massive brand cameras and common communication protocols.

Learn more at Page 2

Abundant Vision Tools

Abundant tools offer solutions for challenging machine vision applications.

Learn more at LPV

Flexible Extension

IntelliBlink, LPV and IB-AI Tool can be used together to form a more flexible vision solution.

Learn more at Page 2

Convenient Calibration Tools

A variety of easy-to-operate calibration methods are closer to applications.
Learn more at Page 2

Comprehensive Applications

Focusing on multiple segments and providing one-stop solutions.

Learn more at Page 2

WYSIWYG

The results are displayed intuitively due to drag-and-drop Interaction with no prior programming experience required.
Convenient Calibration Tools

The calibration operation is more convenient through a built-in visual calibration window.

Powerful Hardware Compatibility

Support Ethernet port, USB and CameraLink capture card.

Support multi-brand area scan / line scan cameras.
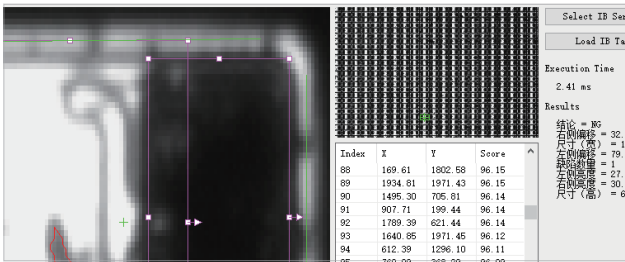

Support multi-brand motion controllers.

Support multi-brand I/O devices.
Support output of images, CSV files, etc.

Flexible Extension

As a Driver

Leaper Vision Toolkit can directly invoke vision tasks developed on IntelliBlink™, significantly reducing the amount of code.
Connect to IntelliBlink AI Server

Data interconnection has been realized between IntelliBlink™ and IB-AI Tool.
Comprehensive Applications

| Solar Photovoltaic | Film | Semiconductor | Li-ion Battery | Laser | Intelligent Logistics |
